

# QUANTIC

# LOVE

You are my quantic love  
In a world made for us  
We're two possibilities  
That collapsed in one  
A new sun was born  
for us both

Schrödinger had a cat  
Who was dead and alive  
I die for you sweetheart  
You're my quantic love  
In the cosmic void  
mmm...

Love is no exact science  
The speed of light  
is too slow for me

I'm in a hurry, baby  
Physics are to blame  
for what I feel?  
God damned gravity

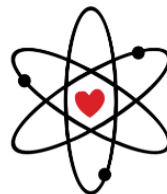

Magic is the science of loving  
In the so-called reality  
There's no place for you and me

Dreaming takes me out  
of limits  
My bed is a drifting raft  
Where's the harbour of your  
arms?

Love is no exact science  
The speed of light  
is too slow for me

I try to solve the equation  
of my heart  
In my Moleskine  
God damned gravity

When you turn off the lights  
Will you love me tonight?  
My eyes shine full of stars  
I'm not down here alone  
entangled with your heart

Francesc Miralles

Inspired by Sonia Fernandez-Vidal's book, *Quantic Love*.
